

SERIES 7

TRACKLESS VEHICLES PICKUP SWEEPER

The winter battle can leave a considerable accumulation of sand and other debris on sidewalks. The Trackless Pickup Sweeper is the ideal attachment for your sidewalk spring clean up.

The sweeper is driven for one or more blocks collecting any debris in its path and then emptied by a hydraulically controlled bottom gate. Rubber skirting on the sides and front eliminate much of the dust. However, best results are obtained by adding the optional spray bar kit and rear-mounted Water Tank.

General Info

Sweeping width: 4' (1219mm)

Broom diameter: 32" (812mm)

Casters: 3 swivel casters, hard urethane tires

Dump: Bottom gate, hydraulic controlled

Drive: PTO to gearbox, shaft to right side,
60 chain to broom sprocket
